

```
<?php
$a = 'C';
$b = 4;

//echo ($a === $b) ? 'EQUAL' : 'NOT EQUAL';

switch ($a) {
case "A" :
    echo $a . " is equal to A";
    break;

case "B" :
    echo $a . " is equal to B";
    break;

case "C" :
    echo $a . " is equal to C";
    break;

case "D" :
    echo $a . " is equal to D";
    break;

default :
    echo "no value for a was a case";
    break;
}

/*
if($a == $b ){
    $c = 'EQUAL';
} elseif($a>$b)
{
    $c = 'a is larger than b';
} elseif($a<$b){
    $c = 'B is larger than A';
}
else {
    echo ' this is a default value <BR>';
    $c = 'NOT EQUAL';
}
echo $c;
```

PHP ternary operator

```
$x = condition ? value if true : value if false;
```

```
if (condition) {
```

```
    code if true
} else {
    code if false
}
*/
```

```
?>
```
