```javascript
var person = {
  age: 25,
  firstName: "John",
  lastName: "Smith",
  fullName: function() {
    return this.firstName + " " + this.lastName;
  }
};
person.firstName = "Mike";
htmlOutput(person.fullName());

function pickArray(a) {
  return myArray[a];
}

function myName(a, b) {
  var fullName = a + ' ' + b; // local fullName
  return fullName;
}

function htmlOutput(myOutput) {
  output.innerHTML = myOutput;
}
```
